## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, line 4, "the rear" lacks antecedent basis.

In claim 12, line 3, "the inner face" lacks antecedent basis.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8-11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 2,408,704 to Taylor.

Prior art to Taylor discloses a door (6) pressed from a sheet of metal to form a concave (9) with marginal flange (10) engaging the step (26) of the closure (24) which covers the concave. The door has spherically shaped corners and curved areas connecting front, side, and bottom surfaces (Figure 2).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 2,408,704 to Taylor.

While prior art to Taylor fails to disclose decorations on the front face of the door and inner face of the display concave, it would have been obvious for one of ordinary skill in the art at the time the invention was made to form decorations on such surfaces for aesthetic reasons or advertisement purposes.

***Relevant Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 2,131,680 and 2,130,617 show vending machines whose doors are formed with concaves for display purposes.
